OPD Notes :  
Video Consultation

Proxy

43/F  
Recurrent neck nodes - FNAC s/o infection

Evaluated for bleeding PV,  
Fever, Fatigue

Found to have low platelets  
Persistent severe thrombocytopenia, platelet -10k  
requiring multiple platelet transfusions.  
Persistently low <30k

Bone marrow biopsy showed Metastatic breast Ca with bone marrow involvement  
CK7, GATA 3 positive, CK20-

IHC: 8/8/1+  
Diagnosed 3months ago

Mammography showed a suspicious breast mass, FNAC not feasible

Post weekly paclitaxel 4cycles last cycle 2months ago  
Now on zoladex+Letrozole

Wants to know further treatment plan as platelets persistently low

PLAN: 18FDG PETCT  
To understand the disease status and plan treatment accordingly  
Discussed with husband in detail about the need of 18FDG PETCT and plan further treatment.
